

TOWARDS ZERO WASTE

**Sustainable fiberboard made
from discarded clothing**

- A solution to the problem of used clothing.
- A circular economy model environmentally friendly.
- Easy to work as plywood boards.

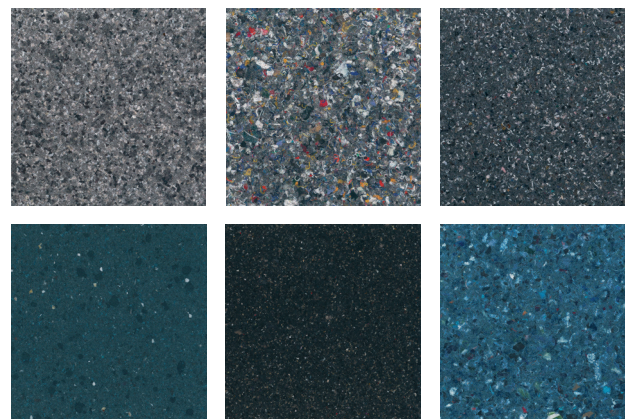

Paneco Fiberboard

The panels are unique, characterised by a stone effect that recalls the beauty of natural granite.

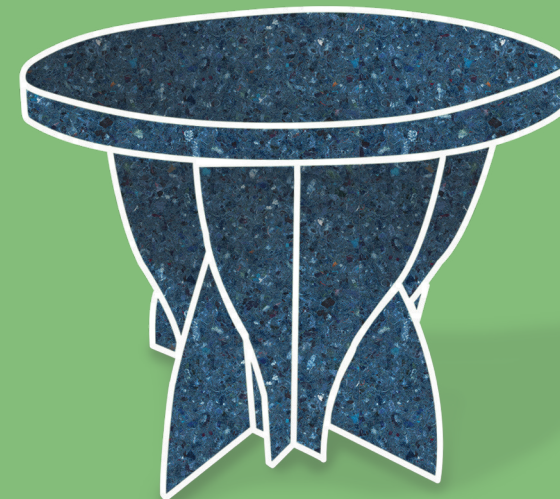

The yield and performance are equivalent to MDF, the fiberboards are versatile and easy to work as wood. To the touch **Paneco®** feels warm, soft and light. It is available in 93 cm x 93 cm, with a thickness of 0.55 cm.

It is available in two styles, stone and sand.

The colour palette comes in three shades: light, middle and dark. **Paneco®** also offers a "Made to order service" which allows you to customise the colour of the panel: from white to black as well as specific requests, according to the requirements of the designer or end customer.

I was a
t-shirt!

**THE MATERIAL
THAT REVOLUTIONISES
INTERIOR DESIGN.**
