Yuji Mizuta creates work based on observations of the intermingling landscapes of everyday life, capturing the internal images that arise from subtle occurrences within them.
Utilizing a wide range of techniques such as drawing, painting, collage, and textile methods including weaving, dyeing, embroidery, and printing, his practice spans various media—from video and installation to performance incorporating dialogue and the body—deepening and expanding his modes of expression.

His works are imbued with intimate traces of memory's uncertainty, bodily sensations, fetishism, and emotional fluctuations, gently permeating the space like drifting incense.
Each piece quietly resonates with the viewer's inner world, reflecting the ephemeral tremors of memory and feeling.

At the core of his practice lies a deep sensitivity to ever-shifting landscapes where diverse languages and cultures intersect and breathe together. Responding to the trajectories and lingering presence left behind by all forms of life and relationships, Mizuta crystallizes these impressions into singular visual expressions that echo his inner landscape.

He has held numerous solo exhibitions both in Japan and internationally, including in Tokyo, Copenhagen, and Singapore.
His multidisciplinary activities include collaborations with companies such as ASICS, Found MUJI, ISETAN MITSUKOSHI, arflex Japan, and maruni, as well as the creation of public artworks for hotels and commercial spaces.

1976 Born in Shizuoka, Japan, based in Tokyo
As of 2025, he is based in Tokyo and continues his artistic practice
